Software

-  **Moovement®** subscription for your organisation
Subscribe via www.moovement.pro/subscribe
-  **Moovement.Pro** web app registration
Organisation's Administrator is registered by Qinematic
Specialist is registered by Organisation's Administrator
-  Installed software
 - Moovement Scan** - 3D Recording software
 - Moovement Lab** - 3D Scan review software
 - Moovement.Pro** - web app via  Chrome or  EDGE

Login and software download

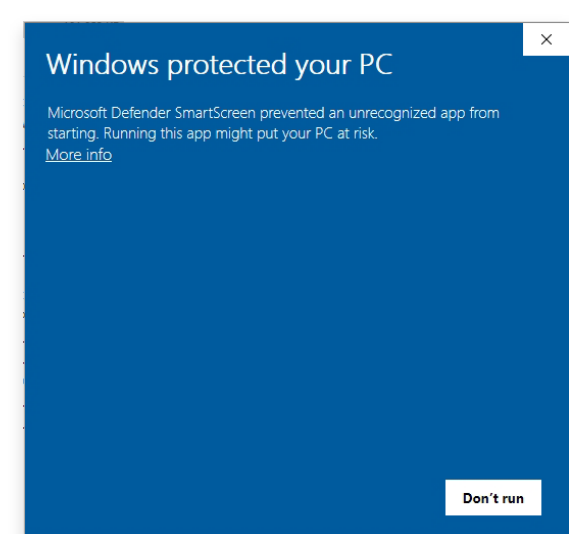

Go to <https://app.moovement.pro> in your browser
Click **Sign in** and enter your email address and password.

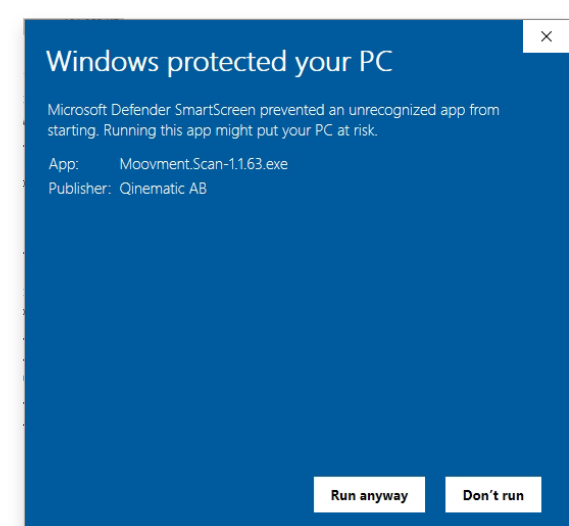

Note that you should have received an email with a first-time password after you got set up by Qinematic staff or your organisations administrator.

Download Moovement Scan and Moovement Lab
At the bottom right of the window you will find download links for the latest software (Windows 10 required).

Allow installation
Your settings may have extra protection against third party software. You may see this notification window. Click [More info](#).

You will see extended information. Check that the publisher is Qinematic AB.

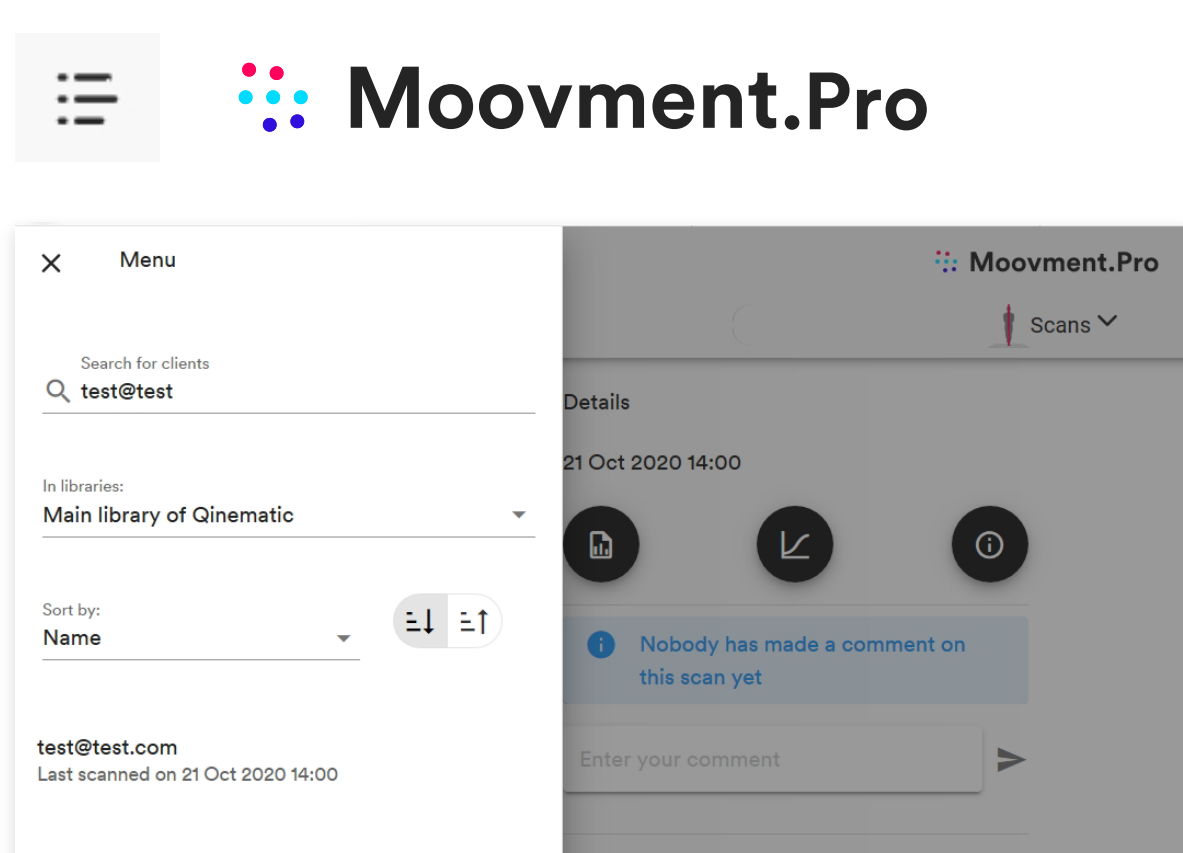

Click **Run anyway**

Calibration and preparation

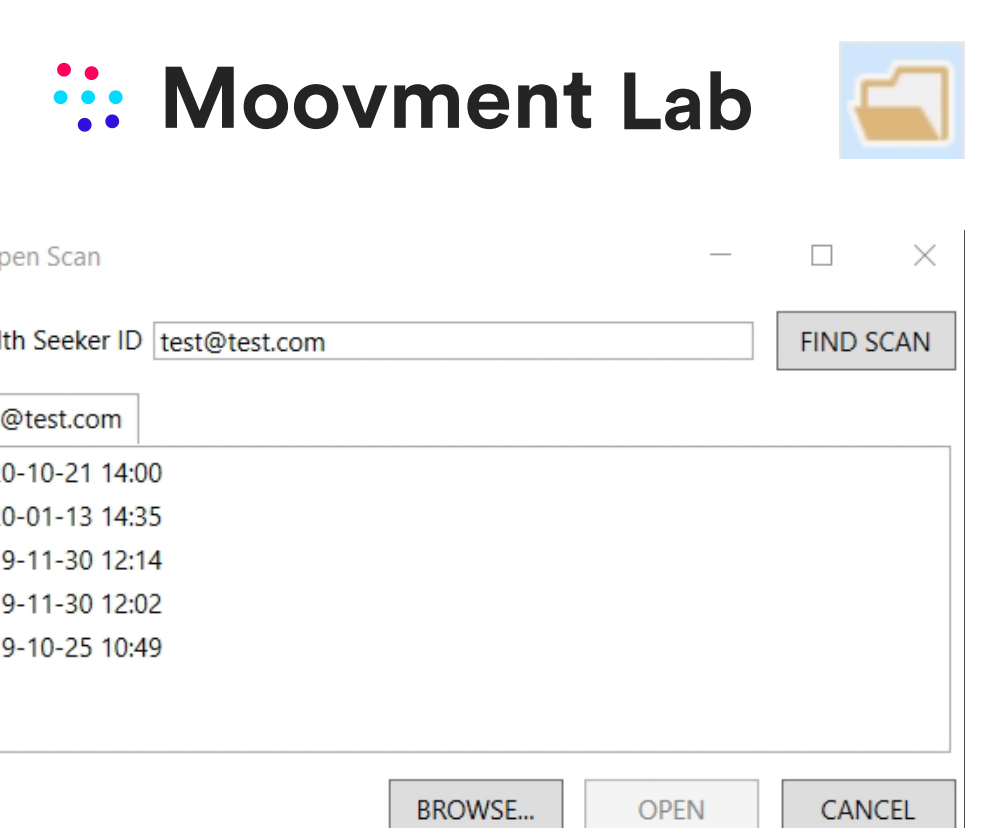

-  Pre scan checklist
We have summarised the key information for good practice on a one page document (see [Moovement Scan Pre Scan Checklist](#))
Please carefully read and follow all instructions.

After the scan

-  Instant feedback availability
Animated Feedback and a Summary report can be viewed on the scan computer once. Thereafter, they can be viewed only in Moovement Lab and Moovement Pro. Optional features like Print, Send, and onscreen Feedback can be added/removed in Settings in Moovement Scan. Press ESC to access Settings in the Moovement Scan menu bar.

Only an authorised Specialist can access an Organisation's scan library. They gain access through Moovement Lab software and the Moovement.Pro webapp. The Specialists needs to know the Identifier (e.g. email) of the Health Seeker that was scanned. These details can be found in the Moovement Pro app by scan date or name.

End-users can register as a Client in the  **Moovement.Pro** web app. In the app, they can view their scans, reports, exercises, health survey results and goals.

Moovement[®] Scan

Hardware setup

Calibration

- Clean scan area without any objects
No person in the field of view
- Start the Moovement Scan software
Stand beside the PC and do not cover the camera
- Wait until all check boxes are green then proceed with scan

Clothing & Preparation

Do not wear

Please wear

Pre Scan Checklist

Software

- Keep Windows updated
Update Windows well before scanning commences.
- Keep Moovement[®] software updated
Always check for updates before scanning.
- Switch off files-on-demand
Cloud services (esp. Microsoft One Drive) decrease computing power of your PC and influence the scan. Also check for other services that may impact the power of your PC.

Scan area

What happens if the steps above are ignored?

- Recognition errors during the scan process.
- Body outline is inaccurate, causing poor tracking.
- You are urged to follow each step (I-V) carefully, to avoid error and repeat testing.

Poor Scan Quality

Final result
